

# Paul Elvere DELSART, the most complete, serious and visionary candidate for the governance of France

[Français](#)

[Español](#)

Paul Elvere DELSART is a French Social engineer, an Eco-entrepreneur, the Director of the Multidisciplinary Participatory Engineering and social construction Program named **EL4DEV**, a Publisher of Anticipation novels and short stories (Social science fiction – Speculative fictions) in real environments and a self-taught Artist. He is notably the author of the Social fiction universes and sub-universes called **the Green Empire of the East and the West** (the **EL4DEV Confederation**), **LE PAPILLON SOURCE**, **The Vegetal Calderas** and **The Civilization of Cats**. He uses social fiction to trigger social innovation. In particular, He assumes his role as a **visionary entrepreneur** by developing solutions to social, environmental and diplomatic problems to ultimately **create innovative and interconnected social enterprises** and then a **new development model**.

**His action plan:** an opportunity for social-political organizational, environmental and cultural change for France and the whole of the nations of the world from 2025 through mass territorial, national and transnational cooperation

## *Presentation*

Mr. Paul Elvere DELSART is a **French social entrepreneur with an atypical profile**. He is the **bearer of an innovative vision** and a highly ambitious **action plan** relating to **social engineering with an international dimension**.

For several years, he has been carrying out a **transnational major societal change program**, the **EL4DEV** program, providing **real operational and organizational solutions** for France, Europe and the whole world.

Paul Elvere DELSART has a **structured and coherent political vision** for France. He designed an **application mechanism** capable of **profoundly modifying all the codes of French society** and of **modifying the very foundations of international cooperation**.

**His objective:** to provide a **highly stimulating framework** and **appropriate participatory tools** to initiate **unprecedented mass decentralized cooperation** and **quantifiable and computer modelable progress actions** to thus **positively transform the social-organizational environment of France and the rest of the world**. All countries are affected by his approach and actions.

## *Process*

To do this, he **first conceptualizes a universe** that he materializes through a new kind of **international Live Action Role-Playing Game - in Alternate Reality** (that is to say using transmedia narration) in which the border between fiction and reality is deliberately imperceptible or even non-existent. It is called "**The EL4DEV Confederation**" otherwise known as the **Green Empire of the East and the West**. This **massively multi-player "strategy game"** is **highly experiential and culturally transformative** because the actors **act as reformers** of all structures and codes of society.

Thus, it brings individuals from different nations, regardless of social-cultural environments, to collectively **build a vast ethical, ecological and societal empire integrating all the nations of the East, West, North and South**. This empire **would be unequalled in human history** because of its atypical characteristics; it is an empire that will prosper greatly over time.

The **Green Empire of the East and the West** is a **very real confederation of individuals, ecovillages, tourist and non-tourist agricultural-climatic plant complexes and small municipalities (less than 5000 inhabitants)** located all over the world and interacting in a **decentralized manner through numerous cooperation agreements** with a common objective of societal development.

Unlike a federation involving a central power, a confederation implies **the sovereignty and empowerment of all the territories, municipalities and peoples involved in the dynamic / movement**.

Like any **mechanism for establishing a new civilization**, that of the **Green Empire of the East and West** includes **the use of multifunctional infrastructures**. These are educational tourist cities and agricultural-climatic eco-landscape complexes labeled **LE PAPILLON SOURCE** and their vertical plant structures that emit beneficial waves and electromagnetic fields called **THE PLANT-GREEN-VEGETAL CALDERAS**.

The foundations and philosophy of **LE PAPILLON SOURCE** are inculcated in the **participatory design, collective construction and operational management** of a set of experimental, agricultural-climatic, agricultural-tourism, educational, **self-managed and interconnected** plant cities and complexes across the world.

Each city / plant complex labeled **LE PAPILLON SOURCE** will be interconnected with others of the same type (**tourist or not**) located around the world, in totally different environments (geographic and social-cultural). **Cultural cooperation connections** (setting up of online intellectual / scientific and artistic cooperation events) will be established between all the countries participating in the initiative (thanks to a **powerful information system** developed by the **EL4DEV program**) in order to design them and build them collectively. All the technical solutions, tools and processes emerging from **the collective intelligence of peoples** (individuals of all social backgrounds and of all

generations) will be shared between nations. It is a **transnational decentralized cooperation project**. All nations are **on an equal footing**.

**LE PAPILLON SOURCE** cities / plant complexes are the **vector of gathering and cooperation of individuals around the world as well as the common objective**: "The beautiful and perfect places, experimental, self-regulated and interconnected cities of refuge and peace represent the goal to be reached for our societies in imbalance."

The peculiarity is that these **multifunctional experimental infrastructures** (with an eco-landscape, agricultural-climatic, educational and tourist function for some) **will belong to the international community** and not to any shareholders. **They will belong to the peoples**; and this in every nation.

**Each country** (specifically individuals and municipalities in these countries) **will be able to finance the collaborative design and construction activities of these cities / complexes** (whether they are tourist sites or simply aimed at regenerating degraded local ecosystems) thanks to a **transnational inter-municipal program** named "**THE MUNICIPALITIES COUNTER-ATTACK**".

The concept of **THE MUNICIPALITIES COUNTER-ATTACK** is simple; we encourage and invite the municipalities, in particular **the smallest and most isolated ones** (less than 5000 inhabitants), **to unite, to cooperate, to group together in National Economic Interest Groups with a 100% societal vocation** (this is that is to say of general interest), in order to **co-finance in unified groups the development** (participatory design + collective construction) and the operation (management + maintenance) of these cities and complexes. **The financing, design and construction of these infrastructures are modular and therefore take place in successive blocks / stages**. The initiation of the process of establishing a city / complex in a designated locality is done systematically by **building upstream of one or more vertical plant structures called "THE PLANT-GREEN-VEGETAL CALDERAS"**.

**THE PLANT-GREEN-VEGETAL CALDERAS** are phase N°1 of implantation. These are **vertical and self-regulated agricultural eco-landscaped parks that can be visited in 3 dimensions** (humidity generators by evapotranspiration of plant species included, tools to fight against the destruction of biodiversity and deforestation, spaces of refuge and well-being for birds and bees, places of relaxation and reconnection with nature for visitors, tools for protection against harmful electromagnetic waves, space for agricultural

production of old and wild varieties using alternative techniques). These are the **key modules** of **LE PAPILLON SOURCE** cities / complexes.

**Collective financing of all infrastructures** is being done **gradually**. The financing capacities evolve with **the increase in the number of municipalities integrating the EIGs**. The more the number of municipalities increases, the more the collective financing capacity of an EIG increases, the more the infrastructures can be important in size / surface or simply in number (located in various localities).

**The interest of participatory financing of municipalities:** the infrastructures built will belong to these inter-municipal and societal economic interest groups. **These general interest EIGs will be the only beneficiaries of the tourism economic benefits derived from the economic model of cities and plant complexes**. The inhabitants of the municipalities as well as the Internet users will also be able to make their contribution to the edifice by **co-financing the development of the infrastructures** via the many online crowdfunding platforms or simply via the website of the **EL4DEV** program.

**Management contracts established between the EIGs and the Think and Do Tank named LE PAPILLON SOURCE EL4DEV** leads them to automatically **transform commercial benefits into various local solidarity and environmental projects so that local populations are the ultimate beneficiaries**. The agricultural production of cities / plant complexes (fruits, vegetables, medicinal plants and honey) will be **distributed to the most vulnerable local populations** (uniformly distributed among the municipalities that are members of the EIGs) or to local or national charitable organizations.

These cities and complexes will also be **sources of employment and major tourist attractions for the localities in which they will be located**. There will only be **one EIG per country**. Each country will have its own national EIG bringing together all the municipalities that have chosen to follow the **national dynamic**.

**LE PAPILLON SOURCE** is therefore not an investment project in the various countries in which it will be established but a **real project for a respectful and balanced alternative society, a process of international cooperation, the empowerment of each nation and then the distribution of wealth locally, nationally and internationally**. It is also a **project of inclusion, cohesion and social peace** for local populations and then of **opening up and international influence** for small isolated and asphyxiated communities around the world.

*The needs, the goal, the key*

Paul Elvere DELSART is **seeking funds for the development of this transformative / reforming program**. This is done in particular by **soliciting patrons and sponsors** that we select internationally.

Funding can be achieved in successive stages because **EL4DEV** is a **multi-lever process, in other words a mechanism with several wheels**. When a step is activated, the next step is automatically activated. The more we advance, the more the interlocking becomes simpler.

Paul Elvere DELSART now needs the **involvement of visionary municipalities in France and around the world adhering to the values of the social and solidarity economy and then looking for alternative development methods and national and international visibility**.

He plans to **interconnect as many of these rural municipalities as possible**, whether in France or elsewhere.

The goal of Paul Elvere DELSART's initiatives is to **collectively found a new just and balanced society** and to **transform the earth into a non-hostile nurturing forest planet** in which living beings thrive. This requires the **launch and the realization of many Pharaonic projects (environment, agriculture, architecture, energy, education, governance, etc.) in all nations**.

If you have always been fascinated by the founding processes of past empires be it the Roman Empire, the Ottoman Empire, the Russian Empire, the Mongol Empire, the Empire of Japan, the Chinese Dynasties, the French Empire or even the African empires **here is the opportunity to join the game (which however has nothing virtual)**.

Thus, the keystone of this **atypical Empire-building "game" of a new kind** is the **powerful and innovative program** of which Paul Elvere Valérien DELSART is the designer: the **EL4DEV** program which integrates the sub-programs **LE PAPILLON SOURCE** (including its **territorial variations**) and its **PLANT-GREEN-VEGETAL CALDERAS** then **THE MUNICIPALITIES COUNTER-ATTACK**

*In short*

In itself, the **EL4DEV** program is a unique international program of **social engineering** (a hidden field of social sciences) and **participatory multidisciplinary engineering** aimed at **empowering all the peoples of the world** and **establishing a new just and balanced civil society**.

It represents a **transnational mechanism** of **national cohesion** and **societal diplomacy** (decentralized international relations based 100% on the societal aspect of development - **The actors of cooperation are small municipalities, ecovillages and micronations**). It creates **new ways of cooperation between all individuals** who work in unified and cooperating national groups, all for a common destiny.

**This environmental, societal, educational, political and geopolitical program** has already attracted the attention of **very high-ranking individuals in several countries** that Paul Elvere Valérien DELSART has personally approached for several years at the shadow of the media. However, it will **remain 100% independent of any influence whatsoever** (whether political, religious, cultural or economic).

It represents a **real opportunity for profound change and rebirth** for all nations who can thus **position themselves as co-actors** in the establishment of a **new cultural and thought movement** with international reach. Paul Elvere Valérien DELSART calls it **the EL4DEV 2nd movement of RENAISSANCE**.

In the end, Paul Elvere Valérien DELSART **calls for the regrouping of small towns in each nation of the world, for national cohesion within territories and nations as well as for collaboration between different peoples**. He invites them to **take part in the "game"**, which will provide them with a **stimulating framework and innovative tools** and then **reveal all of their potential**.

The **Green Empire of the East and the West** is therefore the realization of **several decentralized political-societal unions** integrated by many peoples, municipalities and nations around the world.

As a **major player in the social and solidarity economy (SSE)**, the **EL4DEV** Program intends in its work to bring together and encourage, by "arching" them, the greatest number of local initiatives, in order to give them, through new information and communication technologies (NICT) **a global resonance**.

**Paul Elvere Valérien DELSART wishes to cooperate with all the nations of the world.**

## **EL4DEV - The Age of Collaboration**

The Grand White Paper of the **Think and Do Tank LE PAPILLON SOURCE EL4DEV**, a new **Intellectual Start-up** and **Social Innovation Lab** with **international action** and **concrete action plans**.

A 117-page book, 100% **FREE** to view and/or download online (no forms, no email request).

A Mechanism of National Cohesion for a Profound Transformation of Individuals, Communes/Municipalities, and Nations.

Fundamental Principles of a Concrete Solution to Societal Challenges.

**#thinktank #startup #solution #idea #laboratory #change #society #peace  
#international #development #transformation #project #plan**

"Welcome to a fascinating journey through the revolutionary initiatives of the Think and Do Tank LE PAPILLON SOURCE EL4DEV. This book, a compilation of information sheets, aims to be an instructive and indispensable guide for anyone wishing to understand and participate in the profound transformation of our world. Through social and environmental

innovation, we invite you to discover how we can, together, reshape our societies for a better future."
