

Paul Elvere DELSART's projects

[Français](#)

[Español](#)

The logo for EL4Dev features the letters 'EL' in white inside a red trapezoidal shape, followed by '4Dev' in red.

Paul Elvere Valérien DELSART is a **French social engineer** and a **visionary entrepreneur candidate for the governance of France** since 2022. His societal program is applicable in all countries of the world having all the potential to **profoundly modify human relations** at the heart of nations as well as **relations between peoples** and **between nations**.

He is an **Eco-entrepreneur**, the **Director of the Multidisciplinary Participatory Engineering and social construction Program** named **EL4DEV**, an **Author/Publisher of Anticipation novels and short stories** (Social science fiction – Speculative fictions) in real environments and a **self-taught Artist**. He is notably the author of the Social fiction universes and sub-universes called **the Green Empire of the East and the West** (the **EL4DEV Confederation**), **LE PAPILLON SOURCE**, **The Vegetal Calderas** and **The Civilization of Cats**. He uses social fiction to trigger social innovation. In particular, He assumes his role as a **visionary entrepreneur** by developing solutions to social, environmental and diplomatic problems to ultimately **create innovative and interconnected social enterprises** and then a **new development model**.

Key Concepts

The Green Empire of the East and the West (otherwise named The EL4DEV Confederation)

It is a vision, a societal concept that comes in the form of a live-action role-playing game in alternate reality, a massively multi-player strategy game in which the demarcation between fiction and reality is particularly imperceptible or even non-existent. This atypical game is highly experiential and culturally transformative because the actors act as reformers of all the structures and codes of society. Its particularity: a very innovative transmedia narration – The **Green Empire of the East and the West** is a vast ecological and societal empire unequalled in human history by its atypical characteristics; a highly prosperous empire in time; an empire in which all nations and territories are sovereign and self-sufficient. It is a confederation of individuals and small communities located around the world interacting in a decentralized way through numerous cooperation agreements for a common goal. Also named « **The EL4DEV Confederation** », the empire acts as a supranational ethical body, a kind of alternative « UN ». The **Green Empire of the East and the West** has its action plan (the program « **EL4DEV** ») and has its infrastructure (eco-landscaped cities and complexes labelled « **LE PAPILLON SOURCE** » and their **Green/Vegetal/Plant calderas**). The **Green Empire of the East and the West** is the realization of several **political-societal unions** integrated by many peoples, communities and nations around the world. Its network is woven thanks to a new diplomatic model: **EL4DEV societal diplomacy**. It is built on a new movement of thought leading to a socio-organizational overhaul of global society: **the EL4DEV 2nd movement of Renaissance**.

EL4DEV societal diplomacy

A new non-centralized diplomatic model no longer based on the "economic" factor but the "societal" factor.

The goal is to establish several interregional Politico-Societal Unions:

- **The Mediterranean Societal Union**
- **The African Societal Union**

- **The European Societal Union**
- **The Asian Societal Union**
- **The Oceanian Societal Union**
- **The American Societal Union**
- **The Pacific Societal Union**

The EL4DEV 2nd Movement of Renaissance

Movement of thought and rebirth for all the nations of the world allowed by the positioning of these as Co-actors in the establishment of a new age. **The 2nd movement of Renaissance** is characterized by a complete overhaul of all the codes and structures of the society.

The mother program and its sub-programs

The program « EL4DEV »

Mother program of multidisciplinary participatory engineering, process of positive social engineering, mechanism of social constructivism - Action plan for the implementation of the **Green Empire of the East and the West** – The cross-national program « **EL4DEV** », environmental, societal and political program, is a highly stimulating framework integrating a vast set of appropriate tools to initiate mass cooperation and unprecedented progress actions between peoples and between nations. The goal is to empower peoples and establish a new, just and balanced civil society by modifying the socio-organizational environments of all the territories of the world.

The sub-program and label « LE PAPILLON SOURCE »

« **LE PAPILLON SOURCE** » is a cross-national program for the promotion and participatory design of a vast set of experimental tourist and educational cities and then agro-climatic eco-landscape complexes, all self-managed and interconnected on the 5 continents - These are the showcases of the processes designed and/or promoted and of the philosophy of the program « **EL4DEV** » and therefore of the **Green Empire of the East and the West**.

Territorial versions of the label:

- **LE PAPILLON SOURCE MEDITERRANEA**
- **LE PAPILLON SOURCE INNER AFRICA**
- **LE PAPILLON SOURCE INNER EUROPE**
- **LE PAPILLON SOURCE INNER ASIA**
- **LE PAPILLON SOURCE INNER OCEANIA**
- **LE PAPILLON SOURCE INNER AMERICA**
- **LE PAPILLON SOURCE PACIFIC**

The sub-program « THE MUNICIPALITIES COUNTER-ATTACK »

« **THE MUNICIPALITIES COUNTER-ATTACK** » is a cross-national program of inter-municipal cooperation for the opening up and revitalization of isolated and deprived territories. Several municipalities (particularly the smallest ones - less than 5000 inhabitants) come together in **Societal Economic Interest Groups** with a view to co-funding cross-national decentralized cooperation events and the innovative infrastructures of « **LE PAPILLON SOURCE** ». In return, the financial income from the economic model of the tourist cities (mother cities) is donated to the groups (1 group per country) and therefore to the various municipalities involved with a view to initiating major societal transformations within these municipalities.

Infrastructure

Agricultural climatic and self-managed educational theme parks (Tourist cities)

This is the first model of labelled cities « **LE PAPILLON SOURCE** » - These are holiday resorts for all-inclusive educational and experimental stays.

Agricultural climatic and self-managed plant eco-landscape complexes (self-managed food bank cities)

This is the second model of the cities labelled « **LE PAPILLON SOURCE** » - They are non-touristy (no business model), smaller and represent centers of agricultural production and ecosystem regeneration. The production (100% vegetable) is not marketed but distributed free of charge to local nonprofit organizations responsible for helping the poorest. One of the objects of this group of interconnected complexes is the food self-sufficiency of nations.

The Vegetal/Plant/Green calderas

These are the key modules / agricultural-climatic generators of the cities and complexes labelled « **LE PAPILLON SOURCE** » - These are vertical parks with a metal structure and covered with plants that can be visited in 3D and are presented as sanctuaries and refuges for bees and numerous species of birds. These structures emit a large quantity of electromagnetic waves positively influencing living beings in their surroundings and have a key function in geobiology (acupuncture point on the earth's telluric network). In the architecture of cities and complexes labelled « **LE PAPILLON SOURCE** », the **Vegetal/Plant/ Green calderas** are the centerpieces, the pioneering modules to be put in place before anything else. They are funded by the sub-program « **THE MUNICIPALITIES COUNTER-ATTACK** » and are strategic elements for the revitalization of territories most often located along railway lines (preferred means of transport in the **Green Empire of the East and the West**).

Each Vegetal Caldera is conceived as a **sybiotic entity**, radiating **beneficial electromagnetic fields** throughout the landscape, promoting soil regeneration,

harmonization of plant species, and the well-being of surrounding organisms, humans included.

These calderas act as **powerful ecological magnets**. They attract a **multitude of migratory and resident birds**.

Placed particularly along railway lines, these structures transform train journeys into **immersive visual experiences** through **hanging forest gardens** and **radiant natural sanctuaries**.

The integration of Vegetal Calderas into **LE PAPILLON SOURCE** cities and complexes, and along national railway lines represents a visionary solution that blends ecology, urban planning, and technological innovation.

The Earth is surrounded by several invisible electromagnetic grids known as cosmo-telluric or geobiological networks. These are invisible walls or ropes, roughly vertical, that form a mesh-like grid on the ground. These multiple networks cover the entire surface of the planet.

In addition to being **small green lungs for the planet** and **true acupuncture points** placed on these telluric networks, these structures provide lasting landscape, biological, climatic, and societal value, making rail journeys and the territories they cross more pleasant and resilient to environmental challenges.

The Vegetal Calderas, meticulously arranged, form Biological and Climatic Corridors.

The key tools

EL4DEV Information System

Set of web platforms and tools interconnected and linked to several databases themselves interconnected - Use of Block Chain technology

This Information System is called **BIG SMART DATA EL4DEV**.

EL4DEV audiovisual and event production

Self-production of films, animated films, documentaries, music, songs and shows following a precise line

EL4DEV web TV + EL4DEV studios (within the theme parks)

Tools for making and broadcasting self-made and self-produced programs

EL4DEV editions

Self-publishing of many works around the universe of the **Green Empire of the East and the West**, of the program « **EL4DEV** » and its sub-programs (Collections of short stories, novels, illustrated novels, graphic novels and other comics, counts, poems, essays, manifestos, biographies, etc.) following a precise editorial line

Transnational Intellectual Cooperation Initiatives (T.I.C.I.)

Cross-national online events of intellectual and scientific cooperation for the participatory design of cities and complexes labelled « **LE PAPILLON SOURCE** » - They are funded by the program « **THE MUNICIPALITIES COUNTER-ATTACK** ».

Transnational Artistic Cooperation Initiatives (T.A.C.I.)

Cross-national online artistic cooperation events for the conceptualization and visual promotion of cities and complexes labelled « **LE PAPILLON SOURCE** » - They are funded by the program « **THE MUNICIPALITIES COUNTER-ATTACK** ».

The Green Coin EL4DEV – The cryptocurrency of the Green Empire of the East and the West

Green Coin EL4DEV's mission is to **replace destructive economic models** with a dynamic of **sharing and innovation**. It **puts an end to speculation**, as its value is based **solely on tangible assets**: fertile, productive lands rich in biodiversity certified as **LE PAPILLON SOURCE**.

But this currency is more than just a means of exchange. **Green Coin EL4DEV is the economic unit of the Green Empire of the East and the West**, also known as the **EL4DEV Confederation**. This large-scale global project aims to **rethink society**, placing **intellectual cooperation, sovereignty, autonomy, and ecological innovation** at the heart of the system.

The local initiatives

Transformation of the Prat de Cabanes-Torreblanca into a 21st Century Garden of Eden

In the forward-looking and poetic vision of Paul Elvere DELSART, the **Prat de Cabanes-Torreblanca, Spain**, is no longer merely a coastal nature reserve. It becomes a regenerated sanctuary, a space transfigured by the subtle alliance between biomimetic technology and vegetal power. The **Prat**, now fully in bloom and subsequently enhanced and diversified in its vegetation, sees a **constellation of Vegetal Calderas** emerge: imposing vertical organic structures that serve simultaneously as **biological reservoirs, natural energy stations, and living temples of biodiversity**.

Paul Elvere DELSART's plan **to strengthen the territorial attractiveness of Torreblanca and the Prat de Cabanes-Torreblanca** is based on an integrated approach that combines ecology, tourism, agricultural innovation, and alternative technologies. The core objective is to transform the **Prat** into a true **biological and climatic corridor**.

The development of the **Prat** into a **flower garden** would enhance biodiversity and curb the spread of invasive species.

The establishment of a vegetation corridor would promote species migration and strengthen ecosystem resilience against climate change.

The introduction of repellent plants and habitats for natural predators would limit mosquito proliferation, making the site more attractive to visitors.

The **Prat, enriched with biodiversity**, would become a key ecotourism destination.

The project will begin by modifying adjacent agricultural plots using innovative ecological management techniques, experimenting with agroecological practices such as syntropic farming, agroforestry, permaculture, and electroculture to restore and enrich the soil.

This initiative will raise visitors' awareness of alternative agricultural practices and the dynamics of ecological corridors, helping them better understand their role in environmental restoration.

This will boost the local economy by attracting visitors and diversifying agricultural and tourism-related activities. Consequently, it will generate jobs in sustainable tourism, innovative agriculture, and environmental education.

Paul Elvere DELSART also promotes the **creation of self-managed agroclimatic plant complexes and educational tourist cities** labelled **LE PAPILLON SOURCE** to attract visitors from around the world and position **Torreblanca** as a **model of sustainable development**. Among these innovations, **Vegetal Calderas**, vertical structures **generating beneficial electromagnetic fields**, will play a crucial role.

Creating biological and climatic corridors across Europe

The concept of **biological and climatic corridors** developed by **Paul Elvere DELSART** is part of a holistic and innovative vision of reconciliation between territories, ecosystems, and human societies. It is based on a network of **LE PAPILLON SOURCE-labeled infrastructures, Vegetal Calderas** strategically implemented, particularly along railway lines, and **local revitalization projects**, such as the transformation of **Prat de Cabanes-Torreblanca** in Spain into a **Garden of Eden**.

The **LE PAPILLON SOURCE infrastructures** are designed as **catalysts of harmony** between nature, technology, and human communities, aiming to **regenerate territories** while **creating hubs of social and intellectual innovation**.

The **Vegetal Calderas**, meticulously installed, play a central role in this system: they are **vertical landscape units rich in biodiversity**, acting as **ecological lungs** and **local climate regulators**. Positioned along **national railway lines**, they ensure **large-scale green continuity**, supporting species migration, seed dispersion, and the **climate resilience of regions**.

Paul Elvere DELSART's ambition is to **weave a vast network of biological and climatic corridors across Europe**, connecting rural areas and natural spaces. These corridors would:

- **restore biodiversity** by reconnecting fragmented habitats,
- **reestablish a global electromagnetic balance**,
- **strengthen ecological resilience** in the face of climate disruption,
- and **generate positive local dynamics** through participatory and regenerative projects.

The **transformation of Prat de Cabanes-Torreblanca**, a wetland of great ecological importance in Spain, into an **ecological and educational Garden of Eden**, perfectly illustrates this approach: restoration of fauna and flora, landscape enhancement, citizen involvement, and connection to the European network via **LE PAPILLON SOURCE infrastructures**.

Sources of public funding

Sub-program « THE MUNICIPALITIES COUNTER-ATTACK »

Funding by an inter-municipal societal grouping of cross-national cooperation events and infrastructures (« **LE PAPILLON SOURCE** » including the « **Green/Vegetal/Plant calderas** ») - This is decentralized cooperation (without state intervention) - In return, the financial income from the economic model of the tourist cities (mother cities) is donated to the groups (1 group per country) and therefore to the various municipalities involved with a view to initiating major societal transformations within these municipalities.

The economic model (self-financing) - Partner investment zone

EL4DEV editions

Marketing of works published by the program « **EL4DEV** » - These works are collections of short stories, novels, illustrated novels, graphic novels and other comics, counts, poems, essays, manifestos, collections of testimonies and biographies around the universe of the **Green Empire of the East and the West** as well as the program « **EL4DEV** », the sub-programs « **LE PAPILLON SOURCE** » and « **THE MUNICIPALITIES COUNTER-ATTACK** », the concepts of **SOCIETAL DIPLOMACY** and **EL4DEV Second Movement of Renaissance**. It is possible for investors to fund the writing and publishing of books in exchange for a portion of the profits on sales.

The passports of the Green Empire of the East and the West

Marketing of passports for active citizens - On the model of micronations, the purchase of passports is an act of claiming belonging and financial support to the **Green Empire of the East and the West**. This passport does not replace the passports of the different states. It is possible for investors to finance the printing of passports in exchange for part of the profits on sales.

The derivative products from the universes of the Green Empire of the East and the West, the Le Papillon Source, the Vegetal Calderas, the EL4DEV program and The Civilization of Cats

Additional funding sources

Crowdfunding

Financing of works (including pre-orders), cooperation events, land for the construction of infrastructure or simply agricultural production and equipment

Miscellaneous donations

Financing of works, events, land, infrastructure and equipment such as passports of the **Green Empire of the East and the West**

Legal structures

Thought and action group (Think and Do Tank) « LE PAPILLON SOURCE EL4DEV »

Think and Do Tank with headquarters in the municipality of Torreblanca, Castellón, Spain

6 "Law 1901" French non-profit organizations

6 French non-profit organizations each having a key function in steering the program « **EL4DEV** »

EL4DEV - The Age of Collaboration

The Grand White Paper of the **Think and Do Tank LE PAPILLON SOURCE EL4DEV**, a new **Intellectual Start-up** and **Social Innovation Lab** with **international action** and **concrete action plans**.

A 117-page book, 100% **FREE** to view and/or download online (no forms, no email request).

A Mechanism of National Cohesion for a Profound Transformation of Individuals, Communes/Municipalities, and Nations.

Fundamental Principles of a Concrete Solution to Societal Challenges.

**#thinktank #startup #solution #idea #laboratory #change #society #peace
#international #development #transformation #project #plan**

"Welcome to a fascinating journey through the revolutionary initiatives of the Think and Do Tank LE PAPILLON SOURCE EL4DEV. This book, a compilation of information sheets, aims to be an instructive and indispensable guide for anyone wishing to understand and participate in the profound transformation of our world. Through social and environmental innovation, we invite you to discover how we can, together, reshape our societies for a better future."
