

"THE PAPILLON SOURCE" NEW INTERNATIONAL RELATIONS

SOCIETAL DIPLOMACY PROSPECTIVE OF THE "EL4DEV" PROGRAM

BY PAUL ELVERE VALERIE DELSART
FEBRUARY 2021 - PAGE 1

"THE PAPILLON SOURCE" OR THE FOUNDATION OF NEW GEOPOLITICAL LINKS WITH A SOCIETAL VOCATION

All the countries located in the colored zones (following pages) work jointly for their societal development.

Mass cooperation dynamics are initiated, developed and maintained by the processes of the transnational participatory and multidisciplinary engineering program "EL4DEV".

Within each of these countries, the municipalities, especially the smaller ones, organize themselves locally and operate in unified groups through societal economic interest groups (non-profit) that they compose; this with the objective of financing the participatory design, the collective construction and the progressive development of agro-climatic and agro-tourism environmental infrastructures of which they jointly acquire 100% ownership and enjoy the profits generated (financial income resulting from the economic model of the whole tourist places, indirect economic spinoffs from frequentation, influence, unions generated within their respective territories by the established local cooperations).

These infrastructures are educational by the processes used and exposed then federating and vectors of decentralized cooperation and social peace. They are labeled "THE PAPILLON SOURCE".

The inter-communal cooperation program, which will be established in each of the countries of the various areas mentioned, is called "THE MUNICIPALITIES COUNTER-ATTACK". France is the starting point.

MY MESSAGE

"You will undoubtedly be challenged by such ambitions, consequences of arrogance for some and ignorance for others ...

The results announced in this plan are, however, with certainty, achievable and will be achieved through meticulous use of systems engineering guided by noble ambition.

It is up to you and you alone to understand the message conveyed in the program and to see the finality. For my part, I design the mechanism and show you the path. It's your turn!

Like all of my online publications, this document is part of my manifesto"

THE LABEL "THE PAPILLON SOURCE MEDITERRANEA"

List of geographic areas taken into account for the establishment of a new political-societal union :

M.E.N.A. region "Middle East and North Africa"
Territories of the ancient Roman Empire
Territories of the former Ottoman Empire
Territories of the former Byzantine Empire
Territories of the former Persian Empire
Former spaces of North African and Iberian Islamic conquests
North African countries currently with a strong Muslim culture
European countries currently hosting African and West Asian economic migrants and war refugees
Ethiopia

Objective: a liberation, transmutation, of the cellular memories (trans-generational memories) of humanity which will bring about a modification of the information (underlies a belief system). It is about bringing an end to repetitive patterns and pathogenic emotions that generate discomfort and therefore conflicts. Individuals will thus be re-encoded with new information modifying their relationship to the world.

MY VISION

"More and more people are calling for a strengthening of the global capacity to regulate markets and international relations.

Even today, these international relations are still supposed to relate to the interests of certain states rather than to ethical standards and then to positive and rational exchanges.

So people are looking for another globalization - an alternative globalization - a different globalization - a globalization with a human face."

THE LABEL "THE PAPILLON SOURCE INNER AFRICA"

List of geographic areas taken into account for the establishment of a new political-societal union :

Former Berber territories (North Africa)

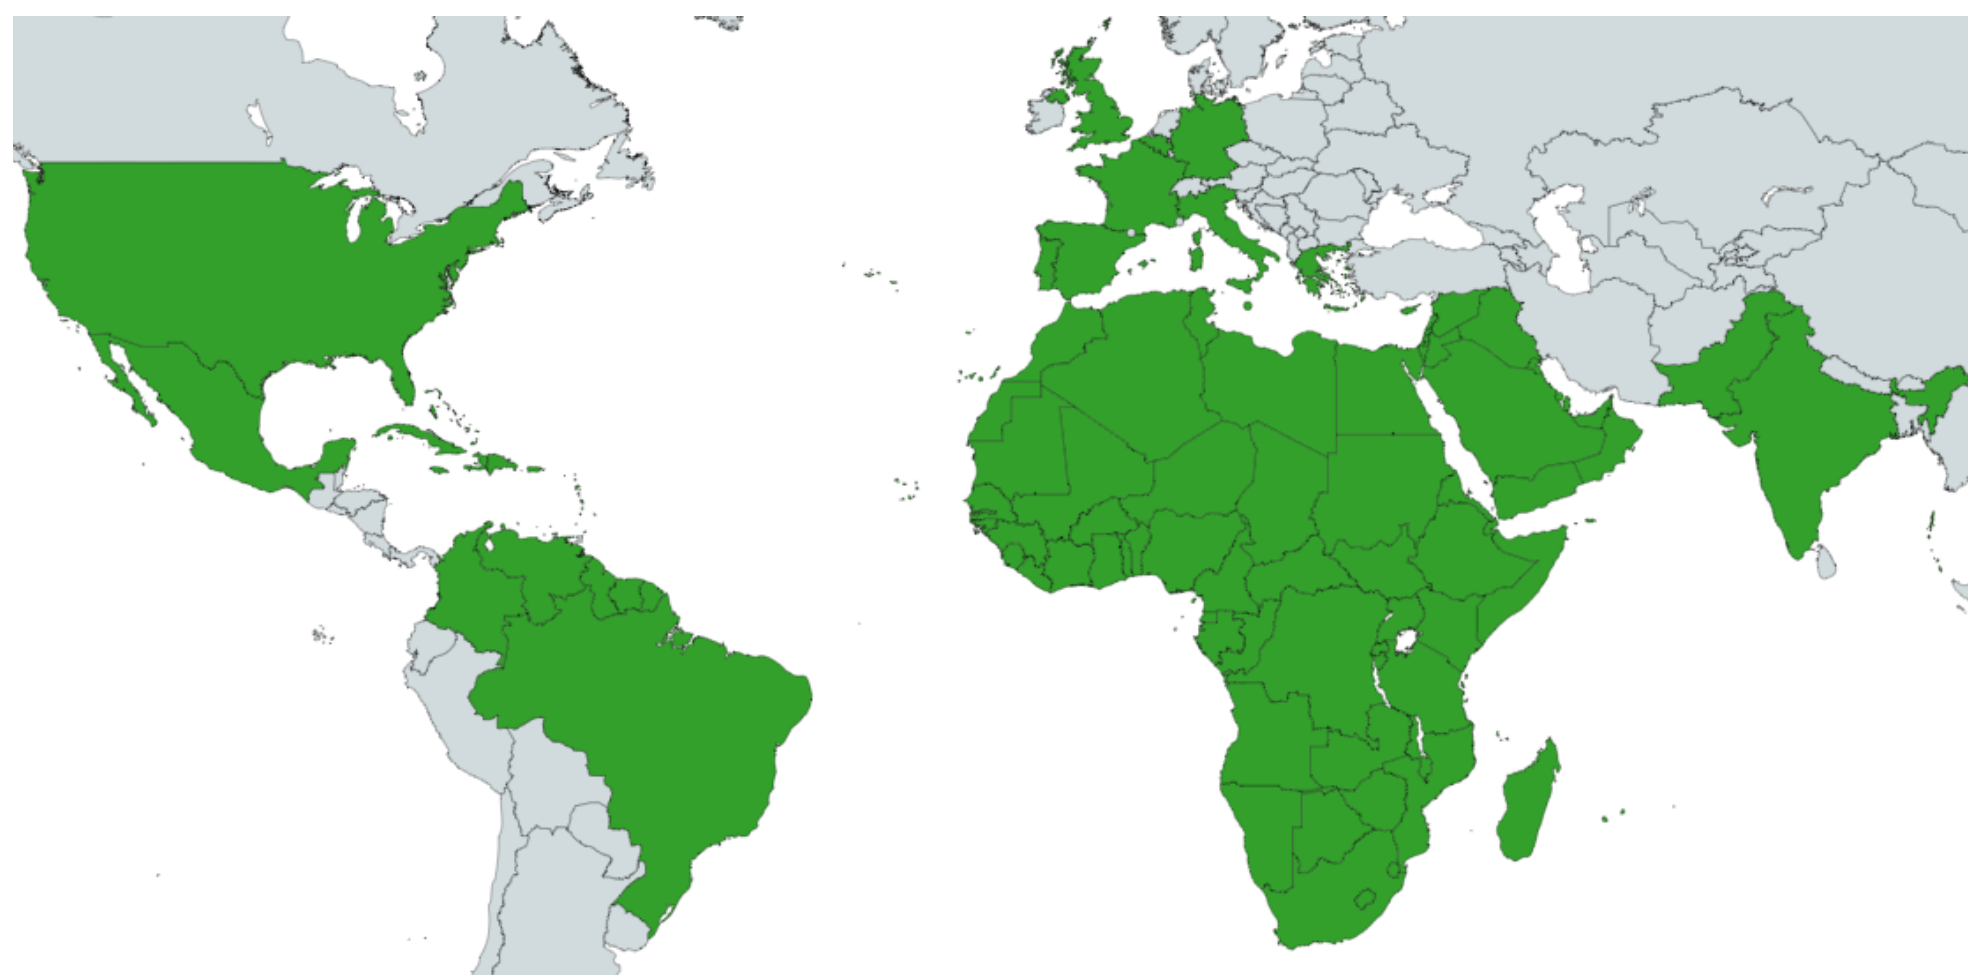

Other countries located on the African continent

Former colonial powers of Africa

European, American, North African and Asian countries that have previously traded Black African slaves

European countries currently hosting African economic migrants and war refugees

Objective: a liberation, transmutation, of the cellular memories (trans-generational memories) of humanity which will bring about a modification of the information (underlies a belief system). It is about bringing an end to repetitive patterns and pathogenic emotions that generate discomfort and therefore conflicts. Individuals will thus be re-encoded with new information modifying their relationship to the world.

MY VISION

"The economy has always been an element of major importance in the diplomatic field, of which states are, in principle, the main authorizing officers.

However, this diplomacy has very often been, and still remains, under the great influence of rich and powerful private actors.

An increase in this "economic factor" is at the origin of a disappearance of the self-sufficiency and sovereignty of nations and peoples, of harmful developments in international relations and the dark fate we know of many peoples."

MY VISION

"In order not to be definitively excluded from the game, a counter-power to economic power must respond by placing itself on the same level of organization, at the global level and no longer at the national level, by unifying and synchronizing actions, at the level of groups of peoples, of nations weighing sufficient weight in global economic flows."

It is about bringing an end to repetitive patterns and pathogenic emotions that generate discomfort and therefore conflicts. Individuals will thus be re-encoded with new information modifying their relationship to the world.

MY VISION

"It is time to fundamentally reconfigure the system of international relations.

States have always adjusted to the effects of economic globalization, which has cost them dearly.

Now is the time for them to adjust to the effects of a new so-called "societal" globalization.

It is time to put an end to all these voracious political-military-economic associations which reduce the freedoms of nations and peoples in favor of new political-societal associations. It's time to experiment locally and then show the world the way forward."

It is about bringing an end to repetitive patterns and pathogenic emotions that generate discomfort and therefore conflicts. Individuals will thus be re-encoded with new information modifying their relationship to the world.

MY VISION

"It is necessary to put in place a regulation.

But is international regulation possible without an international state?

Well, yeah ; this would be based on a new kind of social contract with its system of values.

This social contract and its system of values would be based on a certain conception of the notions of values and reason imprinted in human consciousness.

This concept of social contract would be based on the consent of individuals and would commit them."

MY VISION

"In the ideal territorial civil society, we can logically observe a slight withdrawal of the state from its usual roles and above all a creation of islands of civic engagement working in symbiosis with the state (peoples and leaders act and evolve in the same direction).

These perfectly well organized islands are generated by local dynamics of progress."

MY VISION

"The only way to achieve this consent of the mass (at the macro level) is to focus only on the micro level - through real-time experimentation carried out by the actors of each of the territories around the world and then to massively share these experiences.

These territorial dynamics of the EL4DEV program are all unique since they take into account each local social-economic and cultural particularity.

They are initiated by experience-based projects and then become strongly viral thanks to information technologies (highly interactive projects)."
