PROPOSAL FOR COOPERATION

"LE PAPILLON SOURCE"

and the French railway cooperative RAILCOOP

- **Obvious points of convergence**
- **Two societal initiatives for the opening up and revitalization of territories**
- **A possible strategic cooperation ...**

"LE PAPILLON SOURCE" is an alternative and ethical society project whose foundations and philosophy are inculcated in the participatory design, collective construction and operational management of experimental ecotourism, agro-climatic, educational and interconnected places around the world.

The project relies on the support of the railways to develop its initiatives vector for social peace, national cohesion and societal diplomacy.

Introduction to "LE PAPILLON SOURCE"

It is a tool to channel all the creative, intellectual, operational and financial power of nations around a common societal goal, sought by all regardless of social-economic-cultural environments, genders or generations.

In short !

"Places for individual and collective experimentation, knowledge sharing, incubators for transformative societal projects, engines regenerating degraded environments, self-sufficient places, showcases of what it could be in the world, showcases of a better future, schools of a new genre... on five continents, interconnected, imagined, designed, built by the international community, from every country around the world, in every language."

Why LE PAPILLON SOURCE ?

“

Beautiful and perfect places, experimental, self-regulated and interconnected cities of refuge and peace represent the goal to be reached for our societies in imbalance.

THE CREATION OF
NEW SOCIETAL UNIONS
THE CHANGE OF SOCIETY TO COME

Several municipalities in a country cooperate by jointly participating in the financing of a set of projects for the creation of vertical agroclimatic and agrotourism landscape plant structures called “plant/green/vegetal calderas” throughout their national territory, through the constitution of a National Grouping of Economic Interest with a societal vocation.

ACCESS TO "PLANT/GREEN CALDERAS" WILL BE A PUBLIC SERVICE

PLANT/GREEN/VEGETAL CALDERAS

THIS VAST ARCHITECTURAL AND ORNAMENTAL PROJECT IS THAT OF A MODULAR SET OF LUSH HANGING GARDEN-FOREST-SANCTUARY COMPLEXES INSERTED IN THE HEART OF LARGE GALVANIZED STEEL STRUCTURES OF RECTANGULAR OR CUBIC SHAPE AND THE HEIGHT OF AN 8-STOREY BUILDING.

THE STRUCTURES ARE NOT COVERED WITH ANY COATING (PLASTIC, CARBON, GLASS OR JAIL), NEITHER ON THE SIDES NOR ON THE TOP.

THE FLOORS ARE NOT CONCRETED (ONLY COVERED WITH GRASS AND VARIOUS PLANTS IN THE FORM OF ISOLATED SHRUBS, BEDS, HEDGES, ORCHARDS, ETC.).

PLANT/GREEN CALDERAS

THE MUNICIPALITIES COUNTER ATTACK

MICROCLIMATE

The park has its own microclimate due to its geometric shape (basin) and its high concentration of plants generating a large amount of evapotranspiration. This local microclimate is very pleasant for the birds and bees residing within it. The Park is slightly heated in winter by a device using 100% renewable energy.

ENERGY SELF-SUFFICIENCY

Each park generates its own green energy on its own:

- solar energy by installing numerous photovoltaic and thermal solar panels on the metal structure, in height and on the sides

- piezoelectricity by the use of a large number of crystals implanted in the complex

-ferroelectricity (use of ferroelectric materials, especially iron)

The energy supplied is not collected in traditional batteries but in giant star-mounted super capacitors

#EL4DEV #LE PAPILLON SOURCE

#ELVERE DELSART #PAUL DELSART

ORNITHOLOGICAL SANCTUARY

Ornithological sanctuary for birds of all species: nesters, migratory and non-migratory, native and exotic, endangered (protected area, to preserve and raise awareness of the disappearance of many species of birds) - The birds are in total freedom and stay there only because they find everything they need. They also benefit from optimal protection against harmful electromagnetic waves.

PLANT SANCTUARY

The park brings together a great plant biodiversity

TOURIST FUNCTION

- Agrotourism

- Ecotourism

- Ornithological tourism

- Wellness tourism (retreat center)

- Scientific tourism (ornithological and botanical observatory)

- Educational tourism (educational complex for adults and children, bird safari)

- Event tourism (possibility of renting a part for special events)

TRANSNATIONAL PROGRAM WITH A 100% SOCIETAL VOCATION

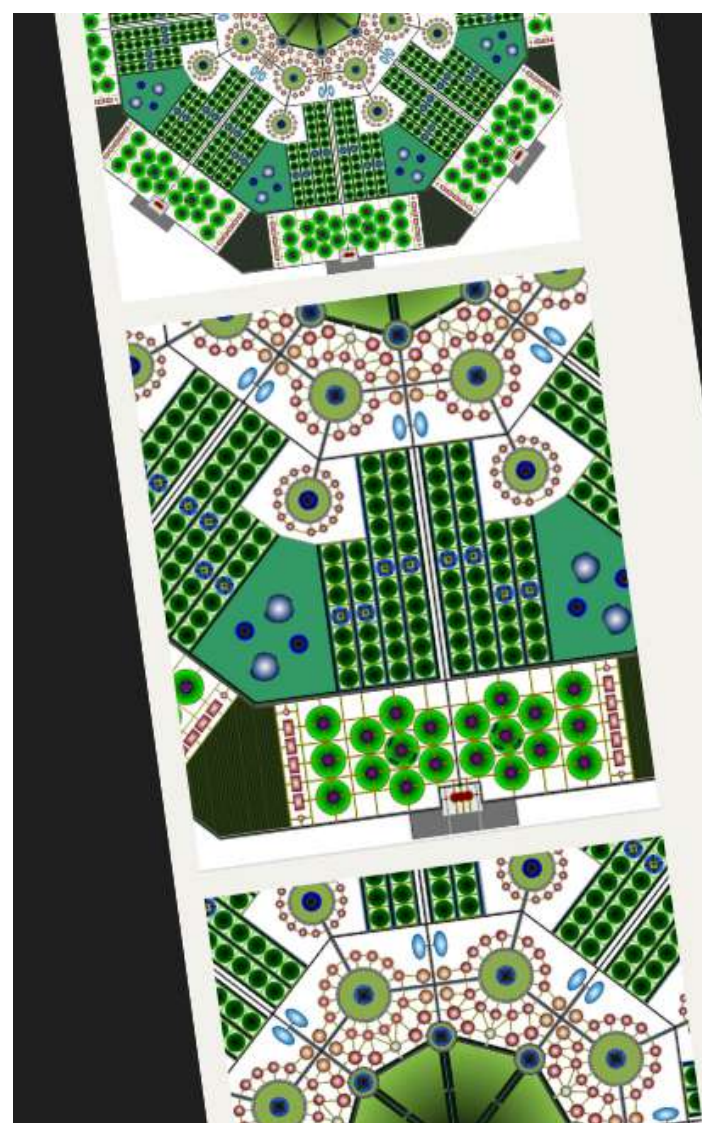

LE PAPILLON SOURCE
EL4DEV PROGRAM

DECENTRALIZED COOPERATION

"THE MUNICIPALITIES COUNTER-ATTACK" and in general "LE PAPILLON SOURCE" are programs / processes of decentralized cooperation, massive distribution of wealth and social inclusion.

The environmental, societal and economic impacts of these agro-climatic and agro-tourism complexes/resorts will be 100% beneficial to local populations. Each of these complexes/resorts will always be initiated by the creation of one or more "plant/green/vegetal calderas".

MASS PLAN OF THE FUTURE ATLAS CITY IN MOROCCO

Support the EL4DEV program
#EL4DEV

GROWTH OF NATIONAL SOCIETAL E.I.G.

Each new plant/green complex will be financed in the same way, by the same actors. An E.I.G. will be able to continuously grow and with that, new complexes will be financed, throughout the national territory, by the growing societal collective of municipalities.

The E.I.G. of different countries of the world will finance their own agro-climatic cities, whether tourist or not.

Unprecedented scientific collaboration will be possible through the events organized by the EL4DEV program

EVENTS

Online intellectual and artistic cooperation events are there to massively mobilize all types of actors at the national level (private and public) and then initiate and drive the exponential international development of an unprecedented cooperation movement.

STARTING POINT: FRANCE

The process is the same in every country in the world.

Each country thus becomes the maker of its own destiny.

France will set the tone, serve as an example, as a leader.
